

ThermoEst joins the FOGALE Sensors / Texys group, specialists in high-performance measurement solutions

On December 15, 2025, ThermoEst has joined the FOGALE Sensors / Texys group, specialists in the design and manufacture of high-performance sensors and measurement solutions.

FOGALE Sensors and Texys Group's reputation stems from their unparalleled ability to tackle complex sensor challenges. Leveraging their cutting-edge expertise, they design sensors and fully integrated systems that withstand extreme conditions, whether it's hostile environments, intense vibrations or high temperatures, to name a few.

ThermoEst has established expertise in its areas of specialization and industrial capabilities that provide a solid foundation for supporting the Group's growth and performance ambitions. Its integration will consolidate existing industrial capabilities, consolidate technological expertise, and strengthen synergies between the Group's various companies.

Within this new organization, ThermoEst will maintain its identity, activities, infrastructure, and teams, while benefiting from a structured group environment that promotes industrial maturity, operational excellence, and sustainable value creation.

Capitalizing on the complementarity of each entity, the group's ambition is to strengthen its position in existing markets and develop new solutions to address high-end customers' needs in metrology and Human-Machine Interactions for even more performant measurements. This integration is part of the FOGALE Sensors / Texys group's development strategy aimed at strengthening its industrial and technological expertise in activities with high operational and regulatory requirements.

Texys
ZA des Chamonds
16 rue Edouard Branly
58640 Varennes-Vauzelles
France
